Professional Experience

FIverr, *Web Developer* ⧉   06/2020

Projects

TuJitume (Business Application) Live site ⧉
- A platform that connects business entrepreneurs, investors & service providers.
- Created using Laravel on the backend, VueJs & ReactJs on the front end for 2 versions, used CICD pipeline. OpenStreetMap & Stripe-Connect were used.
- It is a great opportunity for entrepreneurs to find investors for their businesses, for investors to get business shares, and for service providers to provide business services.

Rewind, *A broadcast monitoring application (Live site)* ⧉
- A platform for artists to monitor their tracks and how they are performing on various social platforms (YouTube, Spotify, Deezer, etc.)
- Created using Laravel, JavaScript, and Bootstrap. Facebook graph API was used.
- Made Monitoring so easy. Includes Facebook-Instagram page traffic, track stats, and a lot more.

Electronic Medical Records ⧉
- It connects HCPs (Health care professionals) with patients where HCPs can store patient data, test reports and prescribe medicine.
- Created using Laravel, JavaScript, and Bootstrap.
- An easy way to store patient data and process data to get the reports, and also connect HCPs and patients.

Real Time Chat ⧉
- A simple real-time chat app made with Laravel Echo & Pusher JS.
